SPECS

The Sabre range is available in two models: the 1200 and the 1500. They are ideal for small block and lifestyle properties. Like all Fieldmaster products, the Sabre range is built tough with quality components for years of service. Sabre slashers can easily be upspecced with enhanced features for cleaner finishing for the more discerning operator. Suitable for tractors 18-40hp, the Sabre Range represents an economical, tough solution for cutting grass or topping overgrowth around the property.
