SPECS

With an extensive model range covering 7 widths the GM Series mowers meet all your mowing requirements.

A specially designed compact twin and 3-rotor format, with synchronised blade overlap allows for an excellent turning circle and manoeuvrability, plus improved contour following in restricted areas.

Triple-stack mulcher blades as standard on the GMM have a central 100 x 10 and upper and lower knife tips to provide finely chopped mulch material in all conditions. These blades are double-edged and can be rotated for even wear and economical cutting life.

GMM SERIES 3 IN 1 MOWER
